MANIFESTO for the Greater London Assembly election 2021

NATIONAL LIBERAL PARTY – Spearheading Self-Determination to Londoners

Giving the self-determinist communities of London a direct voice in the Greater London Assembly!

London is a wonderful mix and diversity of communities, peoples and nations from all around the world. Indeed, with 8 million plus residents, London is the most populous city in Europe.

Within that mix there are many peoples who, or their families, escaped persecution, discrimination or worse, in their homeland, because they dared support a desire to determine their own governance, something we take for granted here in the UK.

Standing for Self-Determination!

For 6th May 2021 Greater London Assembly Election, the NATIONAL LIBERAL PARTY is putting forward a team of 5 ethnically and racially diverse candidates – Tamil, Sikh, Azerbaijan, and Ahwaz but they symbolically represent hundreds of thousands of self-determinists.

There are at least 200,000 Sikhs in London, 100,000 Tamil, 80,000 Kashmiri, 60,000 Kurds, and perhaps some 200,000 others from smaller communities, who wish that their brethren 'back home' could enjoy the same freedoms they enjoy here.

Our election campaign will be **spearheading the message of SELF-DETERMINATION** for all communities and nations around the world. Those communities are substantially represented in numbers, but not politically, in London life and society. Those mix of communities make up London. Even amongst the English there is a growing call to have their own national Parliament as Scotland already has and we would support that too.

Across the world, multiple mini-wars within states like Sri Lanka, India, Pakistan, China, Nigeria, Iran, Turkey, Morocco, Yemen, have or are taking place on the question of peoples' rights to determine their own affairs, form their own parliaments, government and laws, and decide their conditions of life, whether as autonomous areas or even in Independent states.

The very same critical right of SELF-DETERMINATION was/is being played in the domestic and international politics of Britain too. We had the Scottish and EU referendums. The difference is, **whilst we will ultimately be allowed to VOTE on our future, in many countries that right is DENIED on pain of imprisonment or death.** Struggles for SELF-DETERMINATION and freedom, liberty and human rights directly affect and define the lives of many settled and substantive communities in London – the Tamils, the Sikhs, the Kurdish, the Kashmiri and many more.

Legacy of Empire

For many of these peoples the problems first erupted after Britain (and others) began to dismantle her Empire. Unfortunately, they did not ask the inhabitants of the territories they were leaving what they wanted. This was vital because many had been forced to live within artificial borders with very different peoples and sometimes were divided by these borders. Thus, Britain has a **moral responsibility** to help put right a wrong of their making by calling for the right of self-determination for the peoples it once ruled over. If the Government won't do it, the peoples of the Britain, especially London, must **speak out** for these dispossessed people!

SELF-DETERMINATION will be the driving, primary message of this dedicated election campaign.

This is your chance to make your and other voices heard and to make it count!

Join us! Vote for us! Make a Change!

Make LONDON THE CAPITAL OF SELF-DETERMINATION AROUND THE WORLD!

The NATIONAL LIBERAL PARTY is committing to fighting for justice, freedom and self-determination for all nations around the world. Many of the victimised and oppressed communities – Kurdish, Tamil, Sikh, Kashmiri, and Azerbaijani, are living in London. We are committed to human rights, freedom and self-determination, in a wholesome and holistic way for all communities.

HELP US TO HELP YOU.

Vote NATIONAL LIBERAL PARTY

on 6th May 2021!

Make 6th May 2021, SELF-DETERMINATION DAY!

We are committed to:

NATIONAL MINORITIES – All nationalities should have the right to identify themselves in all censuses and questionnaires by their nation and not necessarily by their country of origin (if different). In the meantime, we called upon those communities to ‘write in’ in their ‘real’ identities on March 21st.

DALITS (so-called low-caste South Asians) – We are committed to fighting back against the apartheid of ‘low-caste’ designation against tens of millions of South Asia in India and Nepal by reason of ‘caste’. We call upon the Government to enact the Caste provision in the Equalities Act (2010) to make ‘caste’ discrimination. Caste is a hidden and socially embedded evil affecting thousands of lives in the UK. It has escaped public and international attention for far too long. It must stop NOW!

All candidates, if elected to the Greater London Assembly, pledge the following:

To be the **VOICE** of London’s self-determinist Diaspora’s by providing a platform for and to support where possible ALL self-determinist struggles regardless of their personal cause.

In following the NATIONAL LIBERAL PARTY’S support for **Swiss-style referendums** in the UK, will endeavour to gauge the views of its voters through the use of voting banks via internet petitions and social media. The results will help dictate how an AM will vote on non-self-determinist issues.

Lobby for an end to Caste discrimination by enacting the provision in the UK’s Equality Act.

A proportion of an AM’s salary would be **redistributed** to ‘good causes’.
